Research)

**Unique
Means**

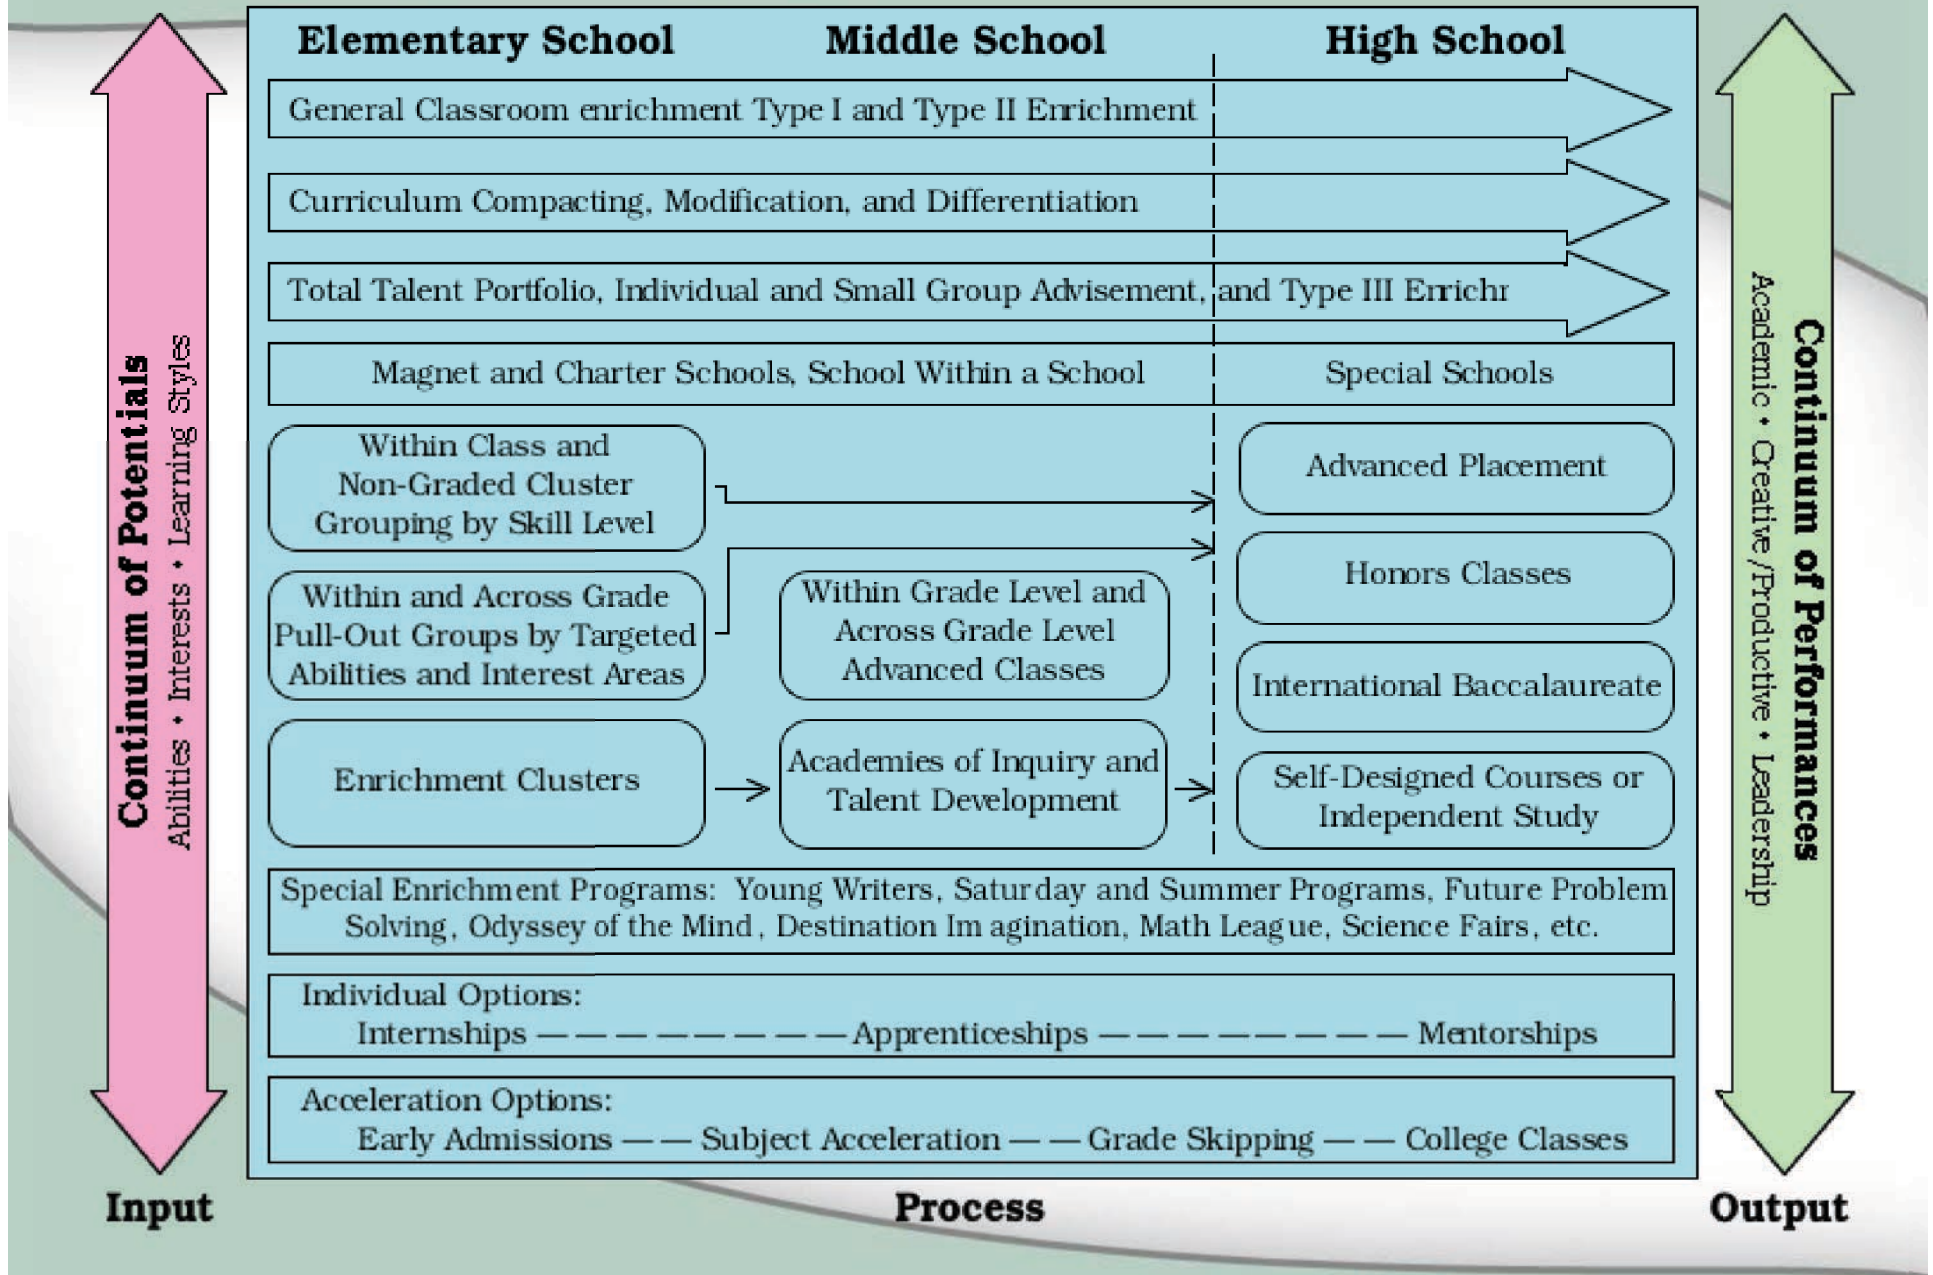

...but there are many
ways to get to Rome.

**Engineering
(Practice)**

There is no one “best way”...here is what we mean by a continuum of services...

The Integrated Continuum of Special Services

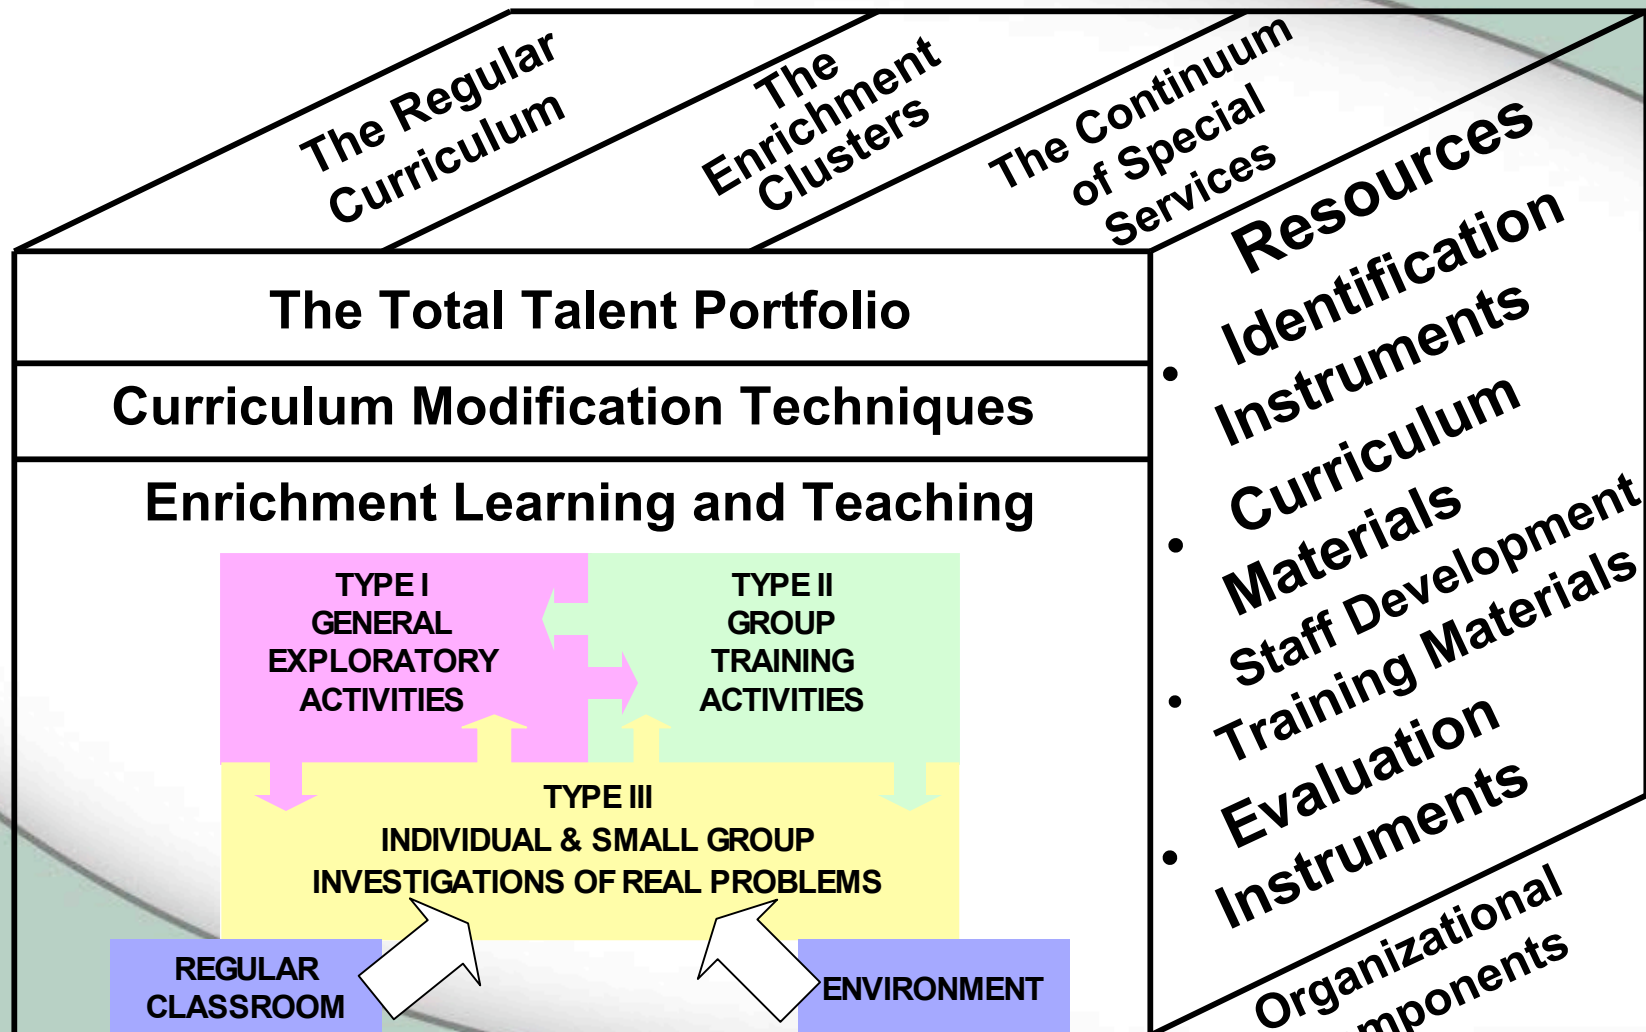

The Schoolwide Enrichment Model

Joseph S. Renzulli & Sally M. Reis

www.gifted.uconn.edu

School Structures

Service Delivery Components

Theme: A rising tide lifts all ships...

The main focus of The Schoolwide Enrichment Model is to apply the pedagogy of gifted education to total school improvement.

All students, from struggling learners to our most advanced students do better in an atmosphere that values diversity among fellow students' talent areas and unique strengths, and a broad range of learning options that are designed to promote high levels of achievement, creative productivity, motivation, and respect for the uniqueness of each student.

SEM Overview

The Basics...

Two underlying theories

*1. Theory of Human Potential
What makes giftedness?*

*2. Theory of High-end Learning
How do we develop giftedness?*

Check out: “The Definition of High End Learning” at:

<http://www.gifted.uconn.edu/sem/semart10.html>

WHAT MAKES GIFTEDNESS?

Continuum of Ideologies in Gifted Education

Traditional
(Conservative)

Contemporary
(Liberal)

- Gifted Students Defined Gifted Behaviors and Services Defined
- Formal Identification Flexible Identification
Certified "Gifted" *Development of Gifted Behaviors*
- Grouping by Ability Grouping by Interests,
Motivation, Learning Styles, and
Tasks
- Funding by "Body Count" Funding by Total District
Population
- Designated Teachers for Designated Schoolwide Enrichment

people?**

Type III

A real product with a real audience...

Christmas

It looked like a merry Christmas after all. Jo awoke on this special morning to find a lovely crimson book of the story of Christmas. But, when the girls went downstairs, their dear Marmee had gone. Hannah, the cook, informed them that she had gone to help a poor family. When Marmee returned, the Marches celebrated by giving the poor family their breakfasts.

When the Marches arrived at the poor family's house how the big eyes stared and blue lips smiled.

'Ach, mein Gott! It is good angels come to us!' said the poor woman, crying for joy.

'Funny angels in hoods and mittens,' said Jo, and set them all laughing.

Little Women, p. 26

Anyone would be pleased to be served this lovely breakfast, even if it weren't Christmas.

BUCKWHEAT CAKES

Difficulty = **

Ingredients:

1/3 cup of fine bread crumbs
2 cups of very hot milk (scalded)
1/2 tsp. of salt
1 tablespoon of molasses
1/4 yeast cake
1/2 cup of lukewarm water
Buckwheat flour

Materials:

Measuring cup
Measuring spoons
Griddle or frying pan
Ladle
Spatula

Method:

1. Pour the milk over the bread crumbs.
2. Let them soak for thirty minutes.

Looking at three kinds of strengths...

If

ran

the school

AN INTEREST INVENTORY

developed by
Deborah E. Burns
designed by Del Siegle

Name _____

Grade _____ Teacher _____

If I ran the school, I would choose to learn about these ten things. I have thought about my answers very carefully and I have circled my best ideas for right now.

I am really interested in:

Science

1. The Stars and Planets
2. Birds
3. Dinosaurs and Fossils
4. Life in the Ocean
5. Trees, Plants, and Flowers
6. The Human Body
7. Monsters and Mysteries
8. Animals and Their Homes
9. Outer Space, Astronauts, and Rockets
10. The Weather
11. Electricity, Light, and Energy
12. Volcanoes and Earthquakes
13. Insects
14. Reptiles
15. Rocks and Minerals
16. Machines and Engines
17. Diseases and Medicine
18. Chemistry and Experiments

Social Studies

1. Families
2. The Future
3. Our Presidents
4. The United States
5. Other Countries
6. History and Long Ago Times
7. Famous Men and Women
8. Problems We Have in Our Town
9. Holidays
10. Native Americans, Asian Americans, Hispanics and African Americans
11. Explorers
12. People Who Live and Work in Our Town
13. Travel and Transportation

Math

1. Math Games and Puzzlers
2. Measuring Lines, Liquids, Weight
3. Shapes and Sizes
4. Buying and Money
5. Calculators and Computers
6. Building
7. Counting and Numbering
8. Calendars and Time
9. Math Stories and Problems

Arts

1. Cartoons
2. Art Projects
3. Painting
4. Clay
5. Acting
6. Dancing
7. Drawing
8. Writing Music
9. Photography
10. Movies
11. Puppets
12. Radio and Television
13. Famous Artists and Their Work
14. Making New Toys
15. Magic
16. Mime

Language Arts

1. Writing a Book
2. Writing Poems
3. Writing Plays and Skits
4. Writing Newspapers
5. Making Speeches
6. Sign Language
7. Making a Book
8. Comic and Cartoon Strips
9. Letter Writing
10. Spanish and French
11. Talking and Listening to Stories
12. Making a New Game or Puzzle

Careers

1. Doctors
2. Lawyers
3. Police Work
4. Fire Fighters
5. Scientists
6. Builders
7. Reporters
8. Store Workers
9. Sports Stars
10. Actors
11. Veterinarians
12. Farmers
13. Writers
14. Engineers
15. Artists
16. Inventors

You forgot to list some of my very special interests. They are: _____

Interest Inventory Factor Structure

Written Products

Oral Products

Artistic Products

Computer Technology

Audio/Visual Technology

Commercial Products

Service Products

Dramatization Products

Manipulative Products

Musical Products

by Joseph S. Renzulli
Linda H. Smith
Mary G. Rizza

LEARNING STYLES INVENTORY

Directions: Read each sentence and decide if it describes an activity that you would like to do in school. For each sentence circle the number that goes with how well you like or dislike each activity. Remember this is not about what you get to do in school but what you would like to do. Be sure to mark an answer for each of the sentences.

	Really Like	Like	Not Sure	Dislike	Really Dislike
1. Going to the library with a committee to look up information.	4	3	2	1	0
2. Studying on your own to learn new information.	4	3	2	1	0
3. Having the teacher ask the class questions on work that was assigned to be studied.	4	3	2	1	0
4. Having a class discussion on a topic suggested by the teacher.	4	3	2	1	0
5. Having other students who are experts on a topic present their ideas to the class.	4	3	2	1	0
6. Working on assignments where the questions are arranged in an order that helps you get them right.	4	3	2	1	0
7. Being a member of a panel that is discussing current events	4	3	2	1	0

Factorial Structure of the Learning Styles Inventory

1. Projects
2. Drill and Recitation
3. Peer Teaching
4. Discussion
5. Teaching Games
6. Independent Study
7. Program Instruction
8. Lecture
9. Simulation

*Let's look at a
few sample
portfolios...*

Me, Myself and I!

A Total Talent Portfolio

My Name _____

My Teacher's Name _____

My Grade _____

This booklet is about you! We would like your mom or dad to help you fill out this interest inventory. An interest inventory is a series of questions about subjects you like best in school and activities you prefer to do outside of school. Your parent or guardian is to help you understand what is being asked and help you think about all of the activities that you do on your own. The answers to the questions should be your answers, not your mom or dad's. The reason we are asking you to complete this inventory is so we can get to know you better. If we know what fascinates you and how you like to learn best, we can help to make your days in school more interesting and successful. Please take your time as you complete this booklet. Think carefully about the questions, there is no need to rush! We would love to have you return this booklet to your teacher in about two weeks. Thank you and have fun!

School Subjects

Circle the smiley face that shows best how you feel about each of the subjects listed below:

Art					
Geography					
Gym					
Math					
Music					
Reading					
Science					
Social Studies					
Writing					

Interests

Use numbers to rank the areas below. Put a 1 next to your favorite activity, a 2 next to your second favorite, etc.

Acting	
Arts & Crafts	
Cartooning	
Creative Writing	
Community Service	
Dancing	
Geography	
History	
Music	
Science Experiments	
Technology/Computers	
Other _____	

Here are some topics that I would love to learn more about:

Learning Style

People like to learn in very different ways. Some people like to read to find out new information. Some people like to put things together to figure it out. Think about how you like to learn new material; do you like it when people tell you something? Do you like to watch someone do something first? Use numbers to rank the areas below. Put a 1 next to the way you like to learn best, a 2 next to the way you like to learn second best, etc.

Computer Activities		
Experimenting (trial and error)		
Listen to a speaker		
Listen to a CD or tape		
Learning Games		
Putting things together		
Reading		
Watching other people		
Watching videos		

Sharing Style

After learning something new, it is wonderful to be able to share it with other people. What ways do you like to share new information? Circle the smiley face that shows best how you feel when you are asked to share in the following ways:

Act or role play	    
Create a display or model	    
Draw a picture or a diagram	    
Explain or discuss	    
Take a test	    
Do a worksheet	    
Write a report	    
Any other ideas for sharing?	

Short term goal: During the next year I would like to:

Environment (some like it hot, some like it cold!) How do you like the room when you are trying to learn something? Make a mark on the line below where you like it best.

Very Quiet Mostly Quiet A little noise is OK Quite a bit of noise is OK Very Noisy

Dark Dim Light but not too bright Nice and light Very Bright

Cold Cool Mild Warm Hot

Working with others: Some people like to work alone, some people like to work with others. How about you? Circle the smiley face that best describes you.

I like to work alone.

I like to work with one other child.

I like to work with an adult.

I like to work with a small group.

I like to work with a whole class.

These are the activities I do and lessons I take outside of school:

When I have free time at home, this is what I like to do:

Special family activities and experiences are:

During your daydreaming time, what do you imagine you will be when you grow up? Draw a picture of it in the cloud!

Family Activities, Travel, or Special Experiences

My Best Ways of Learning

When learning new information at school I like to:

Have the teacher lecture.	
Discuss topics with a group.	
Work on topics of my choice by myself.	
Learn information by watching a video or a film.	
Work on group projects.	
Learn by using the computer.	
Talk with a person who is an expert on the topic.	
Work with another student who already knows the information.	

Rank your top 4 choices with 1 being your best way to learn new information.

When showing what I've learned I like to:

Write.	
Use art.	
Talk about my learning.	
Act it out or make a video.	
Build a display or make a game.	
Do a project on the computer.	
Take tests.	
Other.	

Rank your top 4 choices with 1 being your best way to show what you've learned.

Comments

I learn best...

When it's quiet.	
When there is some noise.	
When there is bright light.	
When the room has soft lighting.	
Early in the day.	
After I've been awake a few hours.	
In the afternoon.	
At night.	
When I have music playing.	
If I can snack while I work.	

Check the sections that tell about your best ways of learning.

because _____

* I best pass on or reveal my knowledge and understanding of materials by

because _____

* It improves my learning in my classes when I and/or my teacher

Curriculum Compacting and Differentiation

Modifying the curriculum
for advanced learners...

Curriculum Compacting Summary Sheet

Definition: Modifying or "streamlining" the regular curriculum in order to eliminate repetition of previously mastered material, upgrade the challenge level of the regular curriculum, and provide time for appropriate enrichment and/or acceleration activities while ensuring mastery of basic skills.

Target Audiences:

- 1. All Talent Pool students (according to Individual Strength Areas), especially when involved in a Type III activity**
- 2. Any non-Talent Pool student who has previously mastered portions of the regular curriculum or who is capable of mastering such materials at an accelerated pace.**

Curriculum Compacting Summary Sheet

Objectives:

1. To create a challenging learning environment within the context of the regular classroom.
2. To guarantee proficiency in basic curriculum.
3. To "buy" time for enrichment and acceleration.

Key Concepts:

1. Modification of the regular curriculum through an assessment of student strengths.
2. Elimination of acceleration of skills activities in strength areas following assessment.
3. Systematic planning of enrichment and/or acceleration activities to replace skills students have already mastered or can master at a faster pace.

Two Kinds of Curriculum Compacting

Basic Skill Compacting

Spelling, Mathematics, or
Language Arts Basic Skills

Easy to implement
because pretesting
is less difficult and
mastery can be
efficiently
documented.

- Does the student already know the skills being covered in the classroom?
- Can proficiency be documented?
- Can certain skills be eliminated?
- Will the student be allowed (and encouraged) to master basic skills at his/her own pace?
- If skills can be mastered at a pace commensurate with a student's ability, will the student be able to help determine what he/she will do in the time earned by displaying mastery?

Two Kinds of Curriculum Compacting

Content Compacting

Social Studies, Science, and Literature

Students may already know the objectives or may be able to read the material and master the objectives in a fraction of the time.

- If the student already knows the content, will he/she have an opportunity to display competency of the subject or topic?
- If students do not already know the content but have the ability to master the material at their own pace, will they be given that opportunity?
- If content mastery can be demonstrated, will the student have the opportunity to select the work that will be substituted?

INDIVIDUAL EDUCATIONAL PROGRAMMING GUIDE

The Compactor

CURRICULUM AREAS TO BE CONSIDERED FOR COMPACTING Provide a brief description of basic material to be covered during this marking period and the assessment information or evidence that suggests the need for compacting.

PROCEDURES FOR COMPACTING BASIC MATERIAL Describe activities that will be used to guarantee proficiency in basic curricular areas.

ACCELERATION AND/OR ENRICHMENT ACTIVITIES Describe activities that will be used to provide advanced level learning experiences in each area of the regular curriculum.

Name it.

Prove it.

Change it.

What material needs to be covered?

Exactly what material is to be excluded?

What enrichment and/or acceleration activities will be included?

What evidence shows a need for compacting?

How will you prove mastery?

Independent Study Acceleration
Mini-courses Honors Courses
College Courses Mentorships
Small Group Investigations
Work Study

Check here if additional information is recorded on the reverse side.

Eight Steps of Compacting

- Select learning objectives
- Create/locate appropriate preassessment
- Identify students who may have mastered objectives
- Pretest/preassess
- Streamline instruction
- Provide instructional options
- Organize enrichment/acceleration options
- Keep records

Questions That Can Be Used To Escalate the Level of Discussions About Concepts and Ideas

Relationships

1. How do these terms go together?
2. Why do they belong together?
3. Is there a name we can give to the relationship?
4. Is there anything that does not belong?
5. How are things alike?

Questions That Can Be Used To Escalate the Level of Discussions About Concepts and Ideas

Clarity

1. Is it clear?
2. What does it tell someone?
3. What makes it clear to someone else?

Questions That Can Be Used To Escalate the Level of Discussions About Concepts and Ideas

Consistency with Evidence

1. How is the statement supported by observations?
2. How is the statement supported by the observations of others?
3. How is the statement supported by data?
4. How does evidence from nature support the statement?
5. How well does your statement reflect the data?

Questions That Can Be Used To Escalate the Level of Discussions About Concepts and Ideas

Use of Examples

1. Can you give an example?
2. Why is it a good example for this purpose?
3. Is there a better example for this purpose?
4. Can you think of an original example?

Questions That Can Be Used To Escalate the Level of Discussions About Concepts and Ideas

Making Sense

1. Is this what you expected?
2. Are there any surprises here?
3. Is there anything that does not fit?
4. Does your hypothesis make sense, given what you know?
5. Can you predict what will be the outcome?

Questions That Can Be Used To Escalate the Level of Discussions About Concepts and Ideas

Acknowledge

Alternative Explanations

1. How else can this be explained?
2. Is your explanation or hypothesis plausible? Can it happen?
3. What does this explanation say that the other doesn't?

Questions That Can Be Used To Escalate the Level of Discussions About Concepts and Ideas

Elaboration of a Theme

1. How is this term related to something we did before?
2. Is it familiar? If so, how?
3. How is it related to anything you did in another class?

Questions That Can Be Used To Escalate the Level of Discussions About Concepts and Ideas

~~Open~~ pen

Accuracy

1. Is the statement consistent with other information on the same topic?
2. How does your model compare with other models?
3. How does it compare with other representations?

TYPE III
INDIVIDUAL & SMALL
GROUP INVESTIGATIONS
OF REAL PROBLEMS

Investigating real problems...

The young person thinking,
feeling, and doing like the
practicing professional...

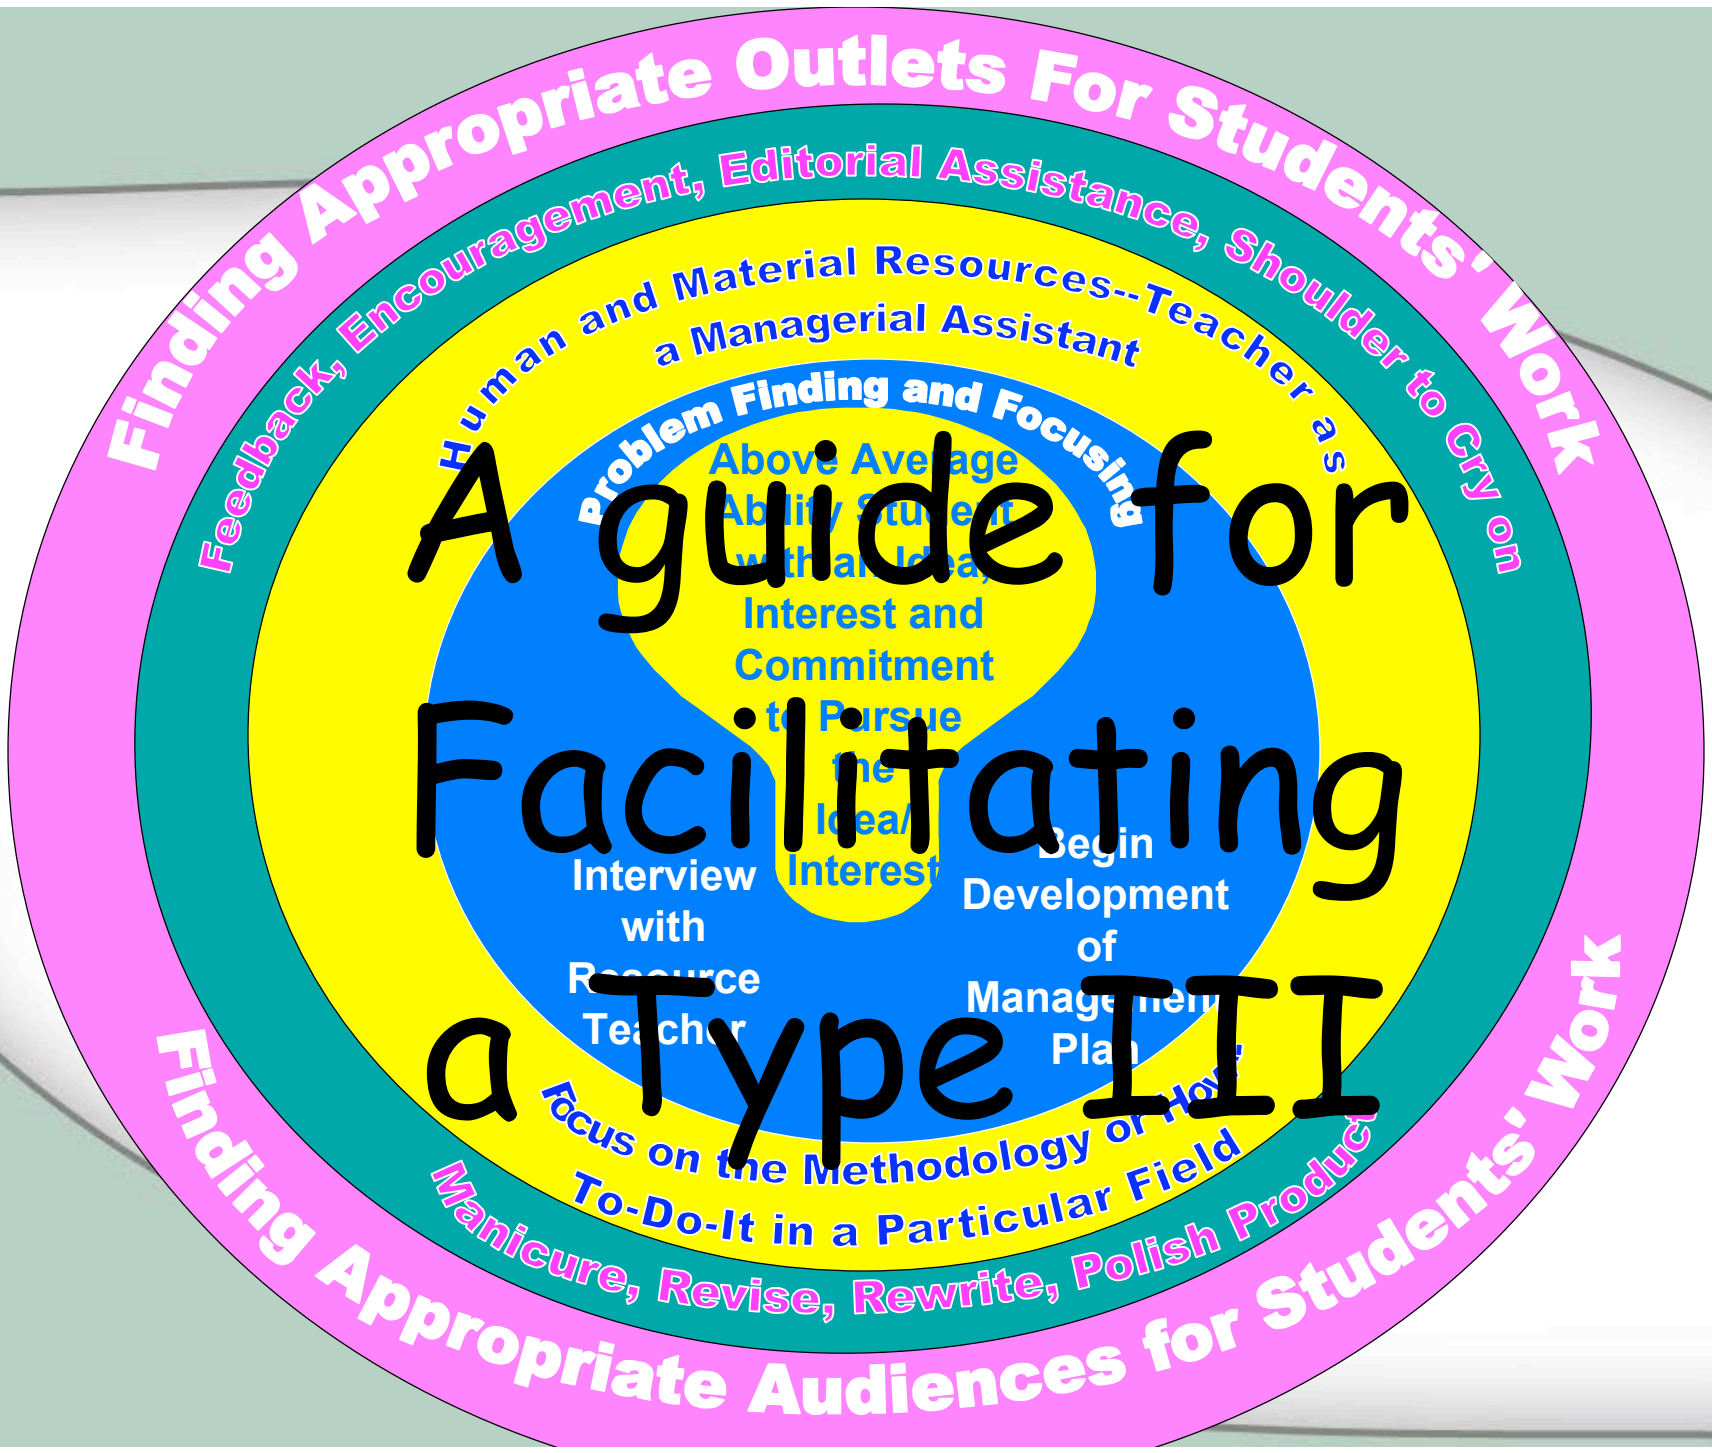

"We don't expect little children to do great things, but
we expect them to do little things in a great way...
even if at a more junior level than
adult scientists, writers,
filmmakers, etc."

What makes a problem real?

What makes a Type III qualitatively different from a typical school assignment?

1. Personalization of the problem
2. Use of authentic methodology
3. Developed to have an impact on a real audience (other than or in addition to the teacher)

MANAGEMENT PLAN
FOR INDIVIDUAL AND SMALL GROUP INVESTIGATION

NAME(S) _____ SCHOOL _____	GRADE _____	Beginning Date _____ Estimated Ending Date _____
-------------------------------	-------------	---

What idea do you plan to investigate? Why?

What form(s) will the final product take?

List some possible intended audiences:
(Name and addresses of contact persons in organized groups on local, state or national level)

How will you communicate the results of your investigation to an appropriate audience?

Getting Started: What types of information or data will be needed to begin your project?

Where can you find that information?

How-to-do-it books/written materials: Use bibliography format.

**Super Hint Number 1 for
getting more authentic Type IIIs...**

Think Data...

Think Instruments!

The Real Dirt on Antibacterial Soaps

Antibacterial soaps are no better than regular soap. Experts have said so for years. But that hasn't stopped millions of Americans from snapping up the supposedly superior germ killers—now 76 percent of the liquid-soap market. Part of the problem was the lack of rigorous studies to back up the experts' claims. But last week at the annual meeting of the Infectious Diseases Society of America, Elaine Larson, associate dean for research at Columbia University's School of Nursing, came up with the goods. In a randomized, double-blind, controlled study—the type of trial used to test pharmaceuticals—she surveyed 224 New York City home-

makers. Half were given ordinary liquid soaps for a full year and the other half received antibacterial soaps. All participants' hands were cultured for germs at the beginning and the end of the study.

The results? At the outset, all participants' hands were teeming with 800,000 to 1 million bacteria. "That's normal," says Larson. "People can have up to 10 million on their hands." By the end of the year, tests revealed that they had just 300,000 or so. It didn't matter whether they used antibacterial soap or not. The difference was that they were taking more time to wash their hands thoroughly, particularly the fingers, which come in contact with the most foreign ob-

jects during the day. Why don't antibac-

terials work better? "Antibacterial soap requires several minutes of contact to work," says Dr. Stuart Levy of Tufts University, author of "The Antibiotic Paradox." "Most people wash their hands for three to five seconds." Unfortunately, residues of antimicrobial soaps do linger on sinks and countertops, where Levy says they may contribute to the development of drug-resistant bacteria. A better solution for people with babies or immune-compromised

WASHED UP: Studies show antibacterial soap is no better than the traditional kind

patients at home is to use an alcohol-based gel, which kills germs by drying them out. Last week the CDC recommended these waterless germicides even in hospitals. Not that's what the doctor ordered.

Super Hint Number 2 for
getting more authentic Type IIIs...

Learn all you can about
How-To Books in the
areas of your student's
interests.

Choosing a Subject and Finding Information About It

The beginner, with or without aid, can easily discover a subject that interests him and that will be worthy of investigation—at least at an introductory level. He needs only to ask himself four sets of questions:

1. The first set of questions is geographical. They center around the interrogative: “Where?” What area of the world do I wish to investigate? The Far East? Brazil? My country? My city? My neighborhood?
2. The second set of questions is biographical. They center around the interrogative: “Who?” What persons am I interested in? The Chinese? The Greeks? My ancestors? My neighbors? A famous individual?
3. The third set of questions is chronological. They center around the interrogative: “When?” What period of the past do I wish to study? From the beginnings till now? The fifth century B. C.? The Middle Ages? The 1780’s? Last year?
4. The fourth set of questions is functional or occupational. They center around the interrogative: “What?” What spheres of human interest concern me most? What kinds of human activity? Economics? Literature? Athletics? Sex? Politics?
